2. Executive Summary - 3
3. Singapore me Cloud Kitchen kya hai - 5
4. 2021-2022 ke figures aur growth - 8
5. Delivery Apps ka role - 12
6. Rental, Labour aur Costing - 16
7. Chhote Hawkers ke liye seekh - 20
8. 2024 ke liye Outlook - 22

1. FOREWORD
Dosto, ye report 2023 ke start me likhi gayi thi. Iska maksad simple tha, Singapore me jo cloud kitchen ka wave aaya tha usko figures ke saath samjhana. Humne 84 operators se baat ki thi, Tampines, Woodlands, Jurong, Kallang sab cover kiya tha.

2. EXECUTIVE SUMMARY
2023 ke start tak Singapore me 220 se zyada active cloud kitchen units the. 2020 ke baad jab delivery demand double hui thi, bahut saare F&B owners ne bina dine-in ke sirf delivery wala model try kiya tha. Is report me humne dekha tha ki average order value $18.40 tha, aur ek cloud kitchen unit ek mahine me average 1,900 orders nikaal raha tha. Commission 25% se 30% tak tha, jo sabse bada kharcha tha.

3. SINGAPORE ME CLOUD KITCHEN KYA HAI
Seedhe shabdon me bole to cloud kitchen ka matlab hai bina customer seating ke sirf khana banane wali jagah. Yahan customer aake nahi khata, sirf GrabFood, foodpanda, Deliveroo se order jaata hai. Ek hi shop me 3-4 alag brand bhi chal sakte the. Jaise ek hi kitchen se chicken rice bhi nikal raha hai aur mala hotpot bhi. Setup cost normal kopitiam stall se kam thi, lagbhag $15,000 se $30,000 me kaam start ho jaata tha.

4. 2021-2022 KE FIGURES AUR GROWTH
2021 me delivery F&B market lagbhag $1.1 billion ka tha. 2022 me ye badh ke $1.28 billion ho gaya tha. Cloud kitchen share isme se lagbhag 14% tha. Jurong East, Bedok, Yishun me naye units sabse zyada khule the kyunki wahan HDB density zyada thi. Average preparation time 11 minute tha, aur rider wait time 7 minute tha. Weekend pe orders weekday se 42% zyada the.

Table 1 - Average Monthly Orders per Unit:

2020 Q4: 1,200 orders
2021 Q4: 2,150 orders
2022 Q4: 1,900 orders
Matlab peak ke baad thoda down aaya tha jab dine-in wapas khula tha.

5. DELIVERY APPS KA ROLE
Teen bade players the - GrabFood, foodpanda, Deliveroo. 2022 me GrabFood ka share 52% tha, foodpanda ka 32%, Deliveroo ka 16% tha. Cloud kitchen walon ne bola tha ki app pe photo achhi ho to click 3 guna badh jaata hai. Promo me $5 off wala code sabse zyada chala tha. Bahut logon ne apna khud ka WhatsApp ordering bhi start kiya tha commission bachane ke liye, lekin usme volume kam mila tha.

6. RENTAL, LABOUR AUR COSTING
Cloud kitchen ka monthly rental $2,800 se $5,500 tak tha location ke hisaab se. Ek cook ki salary $2,200 se $2,600 thi, helper ki $1,700 se $1,900 thi. Bijli aur gas mila ke $700-900 lagta tha. Ek $18 wale order me se $5.40 commission me jaata tha, $6 food cost, $3 rental + labour, to haath me $3.60 bachta tha. Isliye volume ke bina survive karna mushkil tha.

7. CHHOTE HAWKERS KE LIYE SEEKH
Report me ye likha tha ki purane hawker stalls ko poora cloud me shift hone ki zaroorat nahi hai. Dono mix karo - dine-in rakho aur ek delivery-only menu banao. Packing achhi karo, gravy alag do, rice ko tight pack karo. Customer review ka reply 24 hours me do to rating 0.4 star tak badh jaati hai.

8. 2024 KE LIYE OUTLOOK
2023 me likhte waqt lag raha tha ki market consolidate hoga. Chhote units band honge, bade players 5-6 location wale bachenge. Healthy food, halal-certified central kitchen aur late-night supper menu me growth dikh rahi thi. Report ka last line ye tha ki khana tasty ho aur time pe pahunche, to model chahe koi bhi ho customer wapas aayega.
